X²O showers

You know you have been thinking about it. You know you really want to. Every time you pass the cleaning product aisle in the supermarket, you look for the simple cure for your shower. You want a clean sparkly shower without being covered in water spots every time, but you haven't got around to dedicating the time and effort it takes to achieve one. Good news. Your clean sparkly shower is only 30 minutes away. There's something new in professional glass and surface cleaning.

X²O easy

Cleaning your glass has never been easier. It only needs some physical effort. X²O is the most powerful and effective take home product available. Many years of research have been dedicated to achieve best and rapid results. This product is a 'must' for all new showers to shield the glass and surfaces and prevent mineral build-up. Older showers take a little bit more effort, but once clean it is easy to keep them shining. A first proper clean of your shower glass/surface needs to be done before you work a cream solution into the glass/surface to remove mineral build-up with a white scrub pad. For a perfect finish, shield the glass/surface from future dirt and staining with a clear liquid.

X²O lasting

After you have clean shower glass/surfaces, it is important to keep it that way. Simply continue to clean the surface with the coloured scrub pad provided and water as required. Once water stops beading repeat the 3-Step X²O process which is normally seen after 6 – 12 months. One kit will last a shower 5 years, and there is no need to waste money on anymore other cleaners.

X²O versatile

X²O is a wonderful product for maintaining a clean sparkling shower glass. It not only cleans and protects your shower glass, it has many more benefits and uses; i.e. each product of the 3-Step process has different uses for porcelain, ceramics, tiles, chrome, stainless steel, plastics and automotive glass. You can even protect your balustrade glass from the rain and enjoy a clear view or apply it to your vehicle windscreen and watch the rain disappear.
